AB Stable, pourable, fluid, detergent compns., esp. suitable for
laundry use, are prepd. which contain active ingredients,
electrolyte, and water, have the ability to form suspensions of
solids, and contain sufficient electrolyte to provide a
temp.-stable, shear-insensitive, substantially nonlamellar compn.
The compns. preparably contain effective amts. of detergents
builder. The compns. comprise a space-filling floclike aggregate of
surfactant-contg. spherulites. Thus, a stable, pourable,
aq., detergent compn. contained linear alkylbenzenesulfonate 10,
coco diethanolamide 5, Na₂CO₃ 5, Na₅P₃O₁₀ 25, CM-cellulose 1.0, and
optical brightener 0.15 %.
